GOLD-G®

BIO SEA CUCUMBER

金牌海参精华液

Gold-G® Bio Sea Cucumber is a traditional supplement that contains sea cucumber (*Stichopus variegatus*) extract and is traditionally used for general health maintenance. It undergoes meticulous manufacturing using modern technology to retain the nutrients while removing fishy taste, resulting in a sea cucumber product that is nutritious and taste better.

Now you can enjoy the benefits of sea cucumber in a simple way, just take it twice per day with 2 tablespoons (30mL) each time before the meal!

金牌海参精华液是一种以金海参提取物为主要活性成分的传统保健品，传统上用于维护整体健康。它采用现代技术精心制作，保留了金海参的营养成分，也去除了腥味，生产出营养丰富、口感更好的海参产品。

现在您可以通过简单的方式享受海参的好处，只需每天两次，每次饭前服用 2 汤匙 (30mL)!

Sea cucumber (*Stichopus variegatus*)

Sea cucumber, also known as Gamat in Malay, and as “Hai shen”, which means the ginseng of the sea in Chinese, is a traditional medicine as well as a health tonic in Asian countries.

Stichopus variegatus is also known as ***Stichopus hermannii***, and is commonly referred as **curryfish, golden sea cucumber, or gamat emas**. It is abundant in pharmacologically active components such as collagen, amino acids, saponins, mucopolysaccharides, and more. Traditionally, it has been believed to be the most effective species for treating joint pain, wound injuries, and back pain.

金 海 参

海参，在马来语中也称为 Gamat，在中文中意为海参的“海中人参”，是亚洲国家的传统药物和保健补品。 *Stichopus variegatus* 也被称为 *Stichopus hermannii*，俗称咖喱鱼，金海参或 gamat emas。

海参富含胶原蛋白、氨基酸、皂苷、粘多糖等多种药理活性成分，传统上对治疗关节疼痛，伤口损伤和背痛最有效。

根据《本草纲目拾遗》记载：“海参，其性温补，足敌人参，故名海参”，海参虽源自海里，却是温补的中药材，而且功效足以跟人参相比，才命名为海参。

According to the "Compendium of Materia Medica": "Sea cucumbers are warm and nourishing in nature, and they are comparable to ginseng, so they are named sea ginseng in Chinese." Although sea cucumber is obtained from the sea, it is a tonic and Chinese herbal medicine, and its efficacy is comparable to that of ginseng, so it is named sea cucumber.

The 7 Wonders of Sea Cucumber

海参7大神奇之术

Self-liquefied

自溶术

When removed from the water, it will be liquefied within a short time without leaving any trace.

在离开海水之后，它会开始将自己溶化为一汪黑水，荡然无存。

Auto-evisceration

再生术

When facing a life threatening situation, it will expels its innards, creates an opportunity to escape from its predator.

在遇到危险或受到强烈的刺激时，它会将内脏从肛门排出体外，混淆敌人趁机逃掉。

Regeneration

修复术

It has the ability to cut itself into two sections and then grow back into two complete sea cucumber after 30 days.

海参为了自我保护会有'自断'现象，约30天后可以完全再生。

Hibernation

睡眠术

It is able to maintain vital signs even put in water with temperature 0-28°C, when temperature is too high or too low, it will goes into hibernation mode.

海参在0至28°C的水温中能保持生命体征，但温度过高或过低时它会休眠，以保存体力。

Tolerance ability

忍耐术

It is cold-resistant and has strong anti-hypoxia capacity. Even 2-3 days kept in sealed container, it would still have vitality.

海参有极强的耐寒和抗缺氧能力，即使放在密封的容器中三天时间，它也能保持生命活力。

Colour change

变色术

It has the ability to change its colour and to alter its shape according to the environment.

海参的体壁颜色是保护色，它会像变色龙一样随着周围环境的变化而改变。

Weather predicting

预测术

It begins hiding in crevices before the arrival of storms. Fishermen rely on this observation to make accurate prediction of the weather.

暴风雨来临前，它就躲在石缝里，以防被风浪卷走。渔民发现它不见时，就知道风暴就要来了。

Professional R & D 专业研发

The technology for extraction of gamat (sea cucumber) is developed by Dr. Zaiton Binti Hassan from Islamic Science University of Malaysia.

海参精华提取技术是由马来西亚本地大学教授Dr. Zaiton Hassan研发。

DR. ZAITON BINTI HASSAN

Associate Professor of Islamic Science University of Malaysia
Lecturer of University Putra Malaysia

Educational Background

PhD (Texas A & M) Food Science & Technology
BS & MS (LSU) Food Science

In Malaysia, Gamat is a type of traditional medicine that is used to treat wounds or as a health tonic, and is consumed by mixing it into soup or vegetables. However, the fishy smell and taste make it less appealing. Additionally, the process of extracting gamat involves natural decomposition and fermentation, which can take up to two years to complete. These traditional extraction techniques for gamat are time-consuming and complex.

After years of continuous research, Dr. Zaiton Hassan developed a sea cucumber extraction system in 1995. This technology system significantly reduces the fermentation and decomposition time of sea cucumber, resulting in a nutrient-rich extract that is easier to digest. Following the development of the sea cucumber extraction system, Gold-G Bio Sea Cucumber is well-formulated and continuously marketed for more than 20 years!

在马来西亚，海参是一种传统药物，用于治疗伤口或作为保健补品，通常人们将其混入汤或蔬菜中食用。然而，海参的腥味和味道导致它变得不太受欢迎。此外，生产海参提取物需要将海参从固体转换成液体的自然分解和发酵过程，这可能需要长达两年的时间才能完成。这些传统的海参提取技术既费时又复杂。

经过多年的不断研究，Zaiton Hassan博士于1995年研制出海参提取系统。该技术系统将海参发酵分解的时间缩短，得到的海参提取物可保留丰富的营养，且更容易消化。继海参提取系统研发后，研究团队精心配制金牌海参精华液，并持续销售超过20年！

ABOUT US

关于我们

GNE HMP is an esteemed international health food supplement company that originated in Jakarta, Indonesia, back in December 2002. Over the years, the company has established an outstanding reputation across Indonesia, thanks to its superior quality products and excellent word-of-mouth.

One of the most notable GNE HMP products is the Jelly Gamat, which contains the highest concentration of sea cucumber extract in the market, making it Indonesia's leading choice. This health food supplement incorporates traditional remedies that have been passed down for decades, with innovation to deliver numerous health benefits.

GNE HMP has rapidly expanded across Indonesia since its inception, and with extensive experience in the health food industry, the company has significantly grown its presence in other Asia Pacific regions. In 2005, GNE HMP Malaysia was established and served as the research and development center and manufacturing headquarters; while GNE HMP Singapore established in 2013, acts as an international trading and servicing center.

Beyond just being a health food company, GNE HMP actively educates people on adopting a healthy lifestyle, including proper diet and appropriate exercise. Additionally, the company is a strong advocate for naturopathy and provides an alternative way to treat or prevent diseases without relying on drugs. Since its establishment, the company has created a robust, comprehensive marketing system and programs, bring not only health but also opportunities for individuals to create wealth.

Amidst the challenges posed by the Covid-19 pandemic, GNE HMP seized a valuable opportunity to venture into the online retail business and strengthen its digital presence across diverse e-commerce channels, such as Shopee and Lazada, in Indonesia, Malaysia, and Singapore. As a result, GNE HMP has built a massive online customer base and plays a prominent role in the health food industry.

In 2023, GNE HMP demonstrated its unwavering commitment to esteemed customers by introducing an exclusive online program tailored for end consumers. To support the program's success, GNE HMP established a dedicated office, GNE I-Trading (also known as GNE e-Dagang), driving an innovative GNE C2C sharing platform. This platform fosters a collaborative and supportive community among diverse customers, offering a range of additional benefits and enriched experiences for GNE consumers of all ages.

Looking ahead, GNE HMP remains steadfast in its commitment to not only raise public health awareness but also elevate the quality of people's lives and contribute to the economic prosperity of the regions. GNE HMP always focuses on leveraging technology and innovation, believing in forging lasting relationships with customers and being at the forefront of positive change in the healthcare industry, empowering everyone to make informed decisions about their well-being.
